

TUSHAR SHARMA

Python Developer

Email: tushar.sharma@gmail.com | Phone: +91-9876543210 | Indore, MP

PROFESSIONAL SUMMARY

Python Developer with experience in Python, FastAPI, Django, REST APIs, SQL, PostgreSQL, MySQL, Git, GitHub, Authentication & Authorization, JWT, CRUD Operations, Database Design, API Integration, and Object-Oriented Programming (OOP). Skilled in developing scalable backend applications, implementing secure authentication systems, designing optimized database schemas, integrating APIs, debugging applications, and collaborating with development teams. Familiar with Docker, AWS, CI/CD, Linux, Redis, and Unit Testing.

TECHNICAL SKILLS

Programming: Python, SQL

Frameworks: FastAPI, Django

API Development: REST APIs, API Integration, CRUD Operations

Databases: PostgreSQL, MySQL, Database Design

Authentication: Authentication & Authorization, JWT

DevOps: Docker, AWS, CI/CD, Linux, Redis

Tools: Git, GitHub

Concepts: Object-Oriented Programming (OOP), Unit Testing

PROFESSIONAL EXPERIENCE

Python Developer Intern

Developed backend applications using Python, FastAPI, and Django. Built and consumed RESTful APIs, implemented Authentication & Authorization using JWT, designed PostgreSQL and MySQL databases, performed API Integration, created CRUD Operations, used Git and GitHub for version control, wrote Unit Tests, and collaborated with frontend developers and QA teams to deliver scalable solutions.

PROJECTS

AI-Powered Resume Screening System

Developed a backend application using Python and FastAPI. Built secure REST APIs with JWT Authentication & Authorization. Designed PostgreSQL database schemas, optimized SQL queries, implemented CRUD Operations, integrated APIs, and applied Object-Oriented Programming principles. Used Git and GitHub for collaboration and version control.

Employee Management System

Built using Django, Python, MySQL, and REST APIs. Designed Database Architecture, implemented Authentication & Authorization, developed CRUD Operations for employee records, integrated third-party APIs, and improved application performance through optimized queries and code reviews.

Task Management Platform

Developed scalable backend services using FastAPI, PostgreSQL, Redis, Docker, and AWS. Implemented CI/CD pipelines, Linux-based deployment, Unit Testing, API Integration, and database optimization to improve application reliability and performance.

RESPONSIBILITIES

Develop and maintain backend services using Python. Build and consume RESTful APIs. Design and optimize database schemas. Implement Authentication & Authorization using JWT. Collaborate with frontend developers and QA teams. Write clean, maintainable, and scalable code. Debug, troubleshoot, and improve application performance. Participate in code reviews and development planning.

EDUCATION

Bachelor's Degree in Computer Science / Information Technology

ATS KEYWORDS

Python, FastAPI, Django, REST APIs, SQL, PostgreSQL, MySQL, Git, GitHub, Authentication, Authorization, JWT, CRUD Operations, Database Design, API Integration, Object-Oriented Programming, OOP, Docker, AWS, CI/CD, Linux, Redis, Unit Testing, Backend Development, Problem Solving, Scalable Applications.
